

Jigsaw

JIGSAW Power Heater

The Jigsaw Power Heater is a long-wave infrared radiant heater which creates a comfortable and embracing atmosphere with a constant and balanced temperature in the area in which is positioned.

All models are constructed with a weather resistant extruded & anodized aluminum casing set with a IP55 protection rate which means a device protected against dust and water jets, so suitable for both indoor and outdoor utilisation without any inconvenience.

There are four power ranges available: 1500, 2800, 2400 and 3200w.

Technical Data

Surface:	Anodized Aluminium
Radiant Element:	IR-C
Voltage:	220-240 Volt, 50-60 Hz
Wattage:	1500w - 3200w
Protection:	IP 55
Installation:	Wall or suspended mounting.
Connection:	3m of 3 core flex

Min. distance from side wall: 0.5m

Min. distance from ceiling: 0.3m

Min. distance from ground: 1.8m

Refer to instruction manual for installation guide

Wattage (W)	Weight	Size (mm)	Amps
1500	5.7 kg	1100 x 201 x 58	6.52
1800	6.4 kg	1250 x 201 x 58	7.83
2400	7.8 kg	1550 x 201 x 58	10.43
3200	9.8 kg	1950 x 201 x 58	13.91

This appliance complies with European Directives:

IMQ Certification

Warranty: 2 years
